## Education

> BS Public Health Sciences, University of Michigan, 2020

## Summary of Experience

Ms. Haley Divis is an Assistant Health Scientist with Cardno ChemRisk. She graduated from the University of Michigan, where she earned her BS in Public Health Sciences, in 2020. While working on her undergraduate degree, Ms. Divis assisted with research at Michigan Medicine in the Pediatric Surgery Research Department that involved mortality risk assessments for infants born extremely premature. In addition to that, she also assisted with research involving liquid ventilation as an intern in the Child Health Evaluation and Research program in 2018. While at Cardno ChemRisk, Ms. Divis has been involved with litigation support.

## Significant Projects

### Environmental

#### *Storm Water Pollution*

Participated in a study to assess efficacy of best management practices employed to filter storm-water. Performed sampling, heavy-metal analysis, and data analysis.

### Clinical Research

#### *Partial Liquid Ventilation*

Aided in a follow up study to assess the long-term health effects of partial liquid ventilation. Assisted with medical chart reviews, distributing follow-up questionnaire, and documenting patient responses.

#### *ELGAN Mortality*

Assisted in a study to form a more accurate risk score index in order to project mortality risk among Extremely Low Gestational Age Newborns (ELGANs). Assisted with data collection, data management, and writing data collection guide.
