

Epidemiology and Community Health Assessment Services

Cardno ChemRisk's Epidemiology Team offers consulting, research and risk interpretation, and assessment and planning services.

Our epidemiologists apply independent scientific and problem-solving skills – shaped by a diverse experience base – to each client's human health science and health risk evaluation needs, large or small. We are pleased to offer top-quality services including the following:

- > Community health assessment and health indicator evaluation
- > Communicable disease consultation
- > Critical reviews and syntheses of published research data
- > Epidemiological research design and management
- > Exposure and health data analysis, surveillance, and interpretation
- > Grants and contracts preparation and data management
- > Public health improvement planning and evaluation
- > Health risk communications
- > Public health and epidemiological training and education
- > Regulatory, policy, litigation, and other decision-making guidance and assessment.
- > Scientific expert panels, reports, and publications

We tailor teams of epidemiologists – and other key health scientists – according to our clients' needs, timelines, and budgets, to objectively and efficiently deliver sound scientific research, reports, and advice.

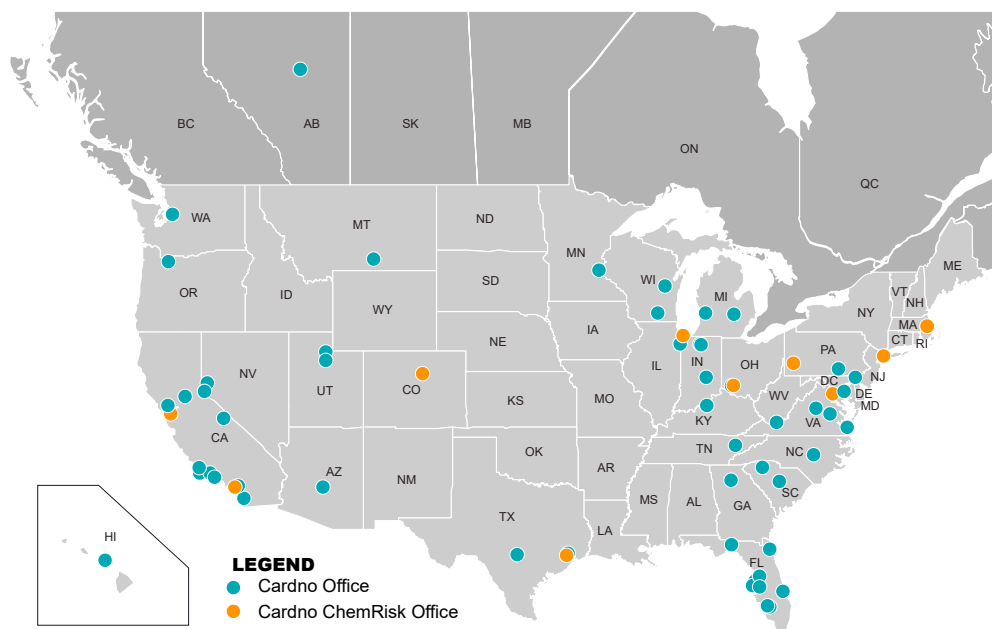

Additional Expertise:

- > Disease control and infection prevention plans, protocols, and guidance
- > Federal, state, and local disease reporting requirements and surveillance systems
- > Social determinants of health and health equity
- > Statistical analysis and data visualization software, such as R, SAS, SPSS, Stata, or ArcGIS, including the ability to analyze large, complex data sets
- > Working with state, territorial, and local health departments and municipalities, as well as hospitals, healthcare facilities, long-term care and assisted living, Federally Qualified Health Centers (FQHCs), and rural health centers, and wherever epidemiology services are needed
- > Workplace health and safety

Our scientists have designed, conducted, and published numerous epidemiological studies in clinical, community, and occupational settings.

Our Locations:

Cardno ChemRisk health scientists have the capability to support local epidemiology and community health assessment needs across the United States and can provide on-site support as needed.
